“

*Electronic Identification (eID) allows businesses and consumers to prove electronically that they are who they say they are and gain access to services or carry out business transactions online.*

## OUR NETWORKS

<http://cef.uv.es/eurologin2020/>

#EUROLogin20

# EUROLogin20

Cloud platforms using the cross-border identification of European citizens through eIDAS nodes

Co-financed by the Connecting Europe Facility of the European Union

# eIDAS regulation

Regulation EU N° 910/2014

This regulation seeks to enhance trust in electronic transactions in the internal market by providing a common foundation for secure electronic interaction between citizens, businesses and public authorities,

This will increase the effectiveness of public and private online services, electronic business and electronic commerce in the Union.

# Our goal

This initiative will integrate the eID Digital Service Infrastructure into the systems of 3 European Electronic Data Interchange Providers that will be connected to 3 different eIDAS nodes, making their services available for cross-border authentication.

# eIdentification

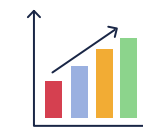

## Benefits of eidentification\*

- **Better user experience** by focusing efforts on establishing a relationship with them.

- **Increased security and liability** thanks to secure solutions and legal certainty provided by eIDAS regulation.

- **Greater efficiency gains** by reduced process cycles, large scale automation, simplified and faster task execution and overall cost reduction.
